X-Series Pharmacy Drawer Systems

The X series combines a range of highly popular pharmacy drawer systems that are used throughout Europe. Designed specifically for the storage of medicines within pharmacies and healthcare facilities the robust structure efficiently provides high density medicine storage with a minimal use of floor space.

- High quality design and materials used, the robust design significantly increases the lifetime of the drawers far exceeding the lifetime of timber drawer systems and inferior products.
 - Angled drawers enable FIFO principle of drug storage
 - Mesh drawer bottoms prevent collection of dust and increase visibility of medicine packs from below
 - Clear Labelling
 - Drawers fully extended increasing storage capacity
- [finishes](#) Cladding packs available in a wide range of

Products

HX Pharmacy Drawer System

LX Pharmacy Drawer System

HX Pharmacy Drawer System

The HX Drawer System is the most commonly used drawer for pharmacy storage. Made with high-quality materials the greatest care is even taken over the smallest details, to produce drawers of the highest standard.

- Thanks to its total, telescopic extraction, maximum capacity combined with a considerable saving of space are guaranteed (10% more in comparison with the traditional drawer) result in an increased overall capacity of the whole structure.
- All the drawers have transparent sides and upper drawers have a transparent base to make it easy to identify all the products.
- A large range of accessories and separators are available, enabling the drawers to be easily labelled and divided.
- Central locking is also available.
- Optional timber drawers fronts and cladding packs available in a wide range of [finishes](#).
- Customised configurations available.

VX Pharmacy Drawer System

The most important requirement for optimising stock flow in an efficient pharmacy storage system is to concentrate the largest amount of medicines in the least space as close as possible to the work station. The VX Drawer System with its unusual inclined bottom, has a number of benefits:

- The product standing upright enables easy reading of the labels facing the outside of the drawer.
- The angled bottom allows the product to fall to the front to facilitate picking up (FIFO medicine storage).
- The drawers partition provide transparent label holders to allow easy reading of bar codes.
- Shorter searching time as the sides of the drawers are transparent.
- The stock holding capacity is improved.
- Total visibility without need of using stools to see the highest drawers.
- Telescopic extraction which allows improves space utilisation.
- 16 VX Drawers per bay.
- Optional timber drawers fronts and cladding packs available in a wide range of [finishes](#).
- Customised configurations available.

Design Services

Our designers can offer expertise in designing pharmacies, surgeries and healthcare facilities. With vast experience in both new build facilities and refurbishment of existing installations our designers are well placed to offer the best services possible.

Process

1. Preliminary Discussions

Start the design process by providing as much information as possible about the premises, send sketches, plans or photos to sales@pharmacy-shelving.co.uk. Better still call us at an early stage of your project and a sales consultant will explain exactly what is needed to achieve best results.

2. Requirements & Process Flow

Specific requirements need to be discussed early in the project to avoid re-working designs. When designing the latest NHS regulations guidelines are always taken into account. A typical dispensing pharmacy process flow is shown in the diagram below:

3. Site Visit

It is not always necessary for FPD to visit your site. Providing accurate plans and photos are made available, specific requirements can be discussed during phone sessions alongside electronic transmission of draft ideas. FPD have successfully managed pharmacy equipment projects in the UK and Overseas, assisting both main contractors and end users without ever visiting premises, our methodology saves time and money for all parties involved.

4. Delivery and Installation

Our job is to make sure your all equipment is received safely and when promised. FPD Group Ltd will make sure fitting teams are provided with adequate instructions and telephone support during installation. Most FPD systems sold are relatively easy to erect, we recommend a professional carpenter or experienced installer is selected in advance of any delivery, our sales team will support this contractor and make them aware of any additional fixings or special tools needed to complete works.

Installations

FPD Group Ltd will make sure fitting teams are provided with adequate instructions and telephone support during installation. Most FPD systems sold are relatively easy to erect, we recommend a professional carpenter or experienced installer is selected in advance of any delivery, our sales team will support this contractor and make them aware of any additional fixings or special tools needed to complete works.

Let us know if you have difficulty in locating a suitable installer, it is possible we have someone in your region that will be pleased to provide a quotation.

How To Order

Selecting The Right Products

Selecting the correct pharmacy storage and shelving products is largely dependent on your budgets and the space available. Our consultants can guide you through the process and advise you on the best solutions. If your looking to fit out your pharmacy please provide is with as much information as possible including floor plans, dimensions and photos.

NHS Purchase Order, MOD Purchase Order, Local Authority Purchase Order

All official government, NHS, MOD, Police, Educational and Local Authority purchase orders are accepted. Email to sales@fpd-group.co.uk.

Pharmacy Shelving Exports

Since 1961 FPD Group Ltd's family have been supplying specialist storage equipment. Our extensive experience and technical knowledge now concentrates on providing clients with a quality selection of products for hospitals and healthcare organisations worldwide. We receive export enquiries and orders from all parts of the world and have established customers in UK, Europe, Africa and Asia. Export business activities are supervised by either our UK or Asia offices.

Our client base ranges from overseas ministry of health, defence, hospitals, surgeries, clinics and doctors to aid agencies and disaster relief. FPD Group Ltd export almost any medical product listed on our websites.

FPD estimators have the expertise to supply a single item or to fully equip many types of healthcare facilities. As well as the initial supply of equipment we also offer room design services using our in-house Autodesk Revit Architecture CAD systems.

** Export items are normally subject to minimum order values, additional protective packing charges and export shipping costs. Prices shown are Ex Works unless otherwise agreed in writing.*
